

Jahiot Liqueurs

The Domaine Jacquot is located in Plassac between Angouleme and Cognac. It's a small family-owned producer who makes cognacs and crème de fruits.

Jean-Yves, owner and master liquorist grows his own cassis on a Southern exposure hill and it's truly the best cassis we have ever tasted. He puts more fruit in the blend and lets the blend macerate for many months, and the result is a very tart and intense cassis taste (other producers will put less fruit and age for only a few weeks, and the result will be very sweet and syrupy).

Crème de Cassis, 18% alc.

The blackcurrants used for Jahiot's Blackcurrant Liqueur are Noir Bourgogne varietal grown exclusively on the estate. This way, the fruits can be picked when ideally ripe and quickly taken to the cellars where they will macerate in the finest alcohol, following a strict process to obtain the most appreciated flavors and aromas of freshly picked berries of Jahiot's Blackcurrant Liqueur.

The fruits have a strong aromatic quality and are highly concentrated. This traditional method of production gives to Jahiot's Blackcurrant Liqueur all the flavors of old traditional blackcurrant.

Crème de Framboise, 18% alc.
